

Serial No. 09/624,810
Docket No. 13DV-13228

In the Claims:

Please rewrite claim 1 as follows. A version of the rewritten claim, marked up to show all changes relative to the previous version of the claim, is contained on a separate page attached hereto as Appendix A.

B1
507

1. (Twice amended) An electron beam physical vapor deposition coating apparatus comprising:

- a coating chamber at an elevated temperature and a subatmospheric pressure;
- a crucible within the coating chamber;
- a coating material surrounded by and contained within the crucible, the coating material having a surface exposed by the crucible;
- an electron beam gun projecting an electron beam onto the surface of the coating material, the electron beam defining a beam pattern having a higher intensity at an interface of the surface of the coating material with the crucible than at a central region of the surface of the coating material.
